

# Caribbean Small Island Developing States (SIDS) Multicountry Soil Management Initiative for Integrated Landscape Restoration and Sustainable Food Systems: Phase 1

## Project Goal Component 1:

Establish, update, and strengthen national and regional soils information, technical capacity and coordination as a basis for improved decision making including on Sustainable Soil Management (SSM) and Sustainable Land Management (SLM)

## Main Outcome of Component 1:

Caribbean countries generate and use Soils and Land Management Data, Information and Maps for Informed Decision Making for LDN and Sustainable, Resilient Land Use Systems in the Caribbean and Establishment of a Sub-regional Soil Support Group. This outcome will seek to increased national and regional capacities for soil analysis through the establishment of the Caribbean Soil Laboratory Network (CARLAN) and Caribbean Soil Information System (CARSIS) for monitoring soil health located at a central repository and managed by the Caribbean Soil Support Group. The institutional mechanism to ensure that this takes place in a seamless manner is through the establishment of the Caribbean Soil Support Group

Caribbean Small Island Developing States (SIDS) multicountry soil management initiative for Integrated Landscape Restoration and climate-resilient food systems

Partnership Initiative for Sustainable Land Management

GLOBAL ENVIRONMENT FACILITY  
INVESTING IN OUR PLANET

Food and Agriculture Organization of the United Nations

Caribbean Soil Support Group for SSM/SLM established and collaborating, with the Latin American and Caribbean Soil Partnership

Caribbean Soil Laboratory Network established based on the strengthening of national soil laboratories under standard Global Soil Laboratory Network

## PROJECT OUTPUTS

National soil data including soil organic carbon reviewed and updated supported by integrated field sampling, and laboratory analysis

Caribbean Soil Information System established and integrated with Regional and Global Soil Information Systems

CSIDS-SOILCARE COMPONENT 1 WAS KICK-STARTED WITH A WORKSHOP TITLED: COUNTRY STATUS ON LEGACY SOIL DATA AND LABORATORY CAPACITY WORKSHOP
