

Project Components Facts sheet: Guyana

Caribbean Small Island Developing States (SIDS) Multicountry Soil Management Initiative for Integrated Landscape Restoration and Sustainable Food Systems: Phase 1 (CSIDS-SOILCARE Phase 1) PISLM CSIDS-SOILCARE Project.

Component 2 Intervention Sites

Guyana has three (3) intervention sites. Arakaka was selected for intervention under component 2 of the project. This component focuses on: **“Addressing the drivers of land degradation through the rehabilitation of land and soil degraded areas; the promotion of integrated landscape management and restoration and the identification and implementation of livelihood alternatives for communities”**. Arakaka is a small community located in Region 1, known for farming, logging, and mining. It faces challenges with erosion and water availability among others.

Component 3 Intervention Site

Little Biabu is the selected intervention site under this component which looks at **“Resilience Building to Land Degradation, Natural Disasters and Climate Change through Climate Smart Agriculture and Drought Risk Management”**. Little Biabu is a small agricultural community located in Region 5. Land degradation is evident through the decline in biodiversity, soil erosion, and a decline in water quantity and quality.

Component 4 Intervention Site

This component focuses on the **“Enhancement of Food Systems and Alternative Livelihoods through promoting agricultural and livestock production systems innovations and mobilization of the Private Sector in Support of LDN Special Climate Change Fund (SCCF)”**. The area selected for intervention of this component is Kimbia. Kimbia is a small farming and logging community located in Region 10. Its main land degradation issues are soil contamination/erosion, vegetation reduction, and a reduction in water availability.
